

## Problem : 1335A- Candies and Two Sisters

```
#include<iostream>

using namespace std;

int main(){

    int NoC;      //NoC means Number of test Case given

    cin»NoC;

    int WoD[NoC]; //WoD means Way of Distribution i.e in how many ways i can
    satisfy the condition given.

    //cout« endl «NoC;

    for(int i=0;i<NoC;i++){

        cin»WoD[i];

        WoD[i] = WoD[i]%2==1?(WoD[i]/2):(WoD[i]/2)-1;

    }

    for(int i=0;i<NoC;i++){

        cout«WoD[i]«endl;

    }

}
```
